DYNAMIC REGISTRATION OF
DYNAMICALLY GENERATED CODE AND CORRESPONDING
UNWIND INFORMATION

5

ABSTRACT OF THE DISCLOSURE

A method and system for enabling the registration of dynamically
10 generated code and corresponding unwind information. In one
embodiment, the present invention creates a module which includes data
related to dynamically generated code and corresponding unwind
information. The present embodiment also provides an application
program interface which allows the data to be registered such that
15 dynamic registration of the dynamically generated code and the
corresponding unwind information is enabled.
